

TECHNICAL SPECIFICATIONS

R104GD Series

Single Packaged Gas/Electric Units 13.4 SEER2, 10.6 EER2, 81% AFUE 2 Ton thru 5 Ton Units

The R104GD Series single packaged gas/electric units are high-efficiency self-contained heating and cooling systems that can be installed on the roof or on a slab. The convertible unit design makes installations simple in all applications. Units are ETL and ETLc listed.

FEATURES and BENEFITS

- **Energy-efficient R-410A refrigerant**
- **Quality Compressor:** State of the art Copeland Scroll compressor is standard equipment.
- **Proven, Industry Standard Components:** Easier service and availability.
- **High and Low Pressure Switch:** Added compressor protection.
- **Aluminum Coils:** Both indoor and outdoor all aluminum coils are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability.
- **Liquid Line Filter Drier:** Factory installed at a convenient location for service.
- **Externally Accessible Service Ports:** Quick access to refrigerant system without disrupting operation.
- **Compact Footprint/Low Profile:** Easy to handle and transport.
- **Heavy-Gauge Full Perimeter Base Rails:** Facilitates forklift handling and curb mounting.
- **ECM Blower Motor:** Constant torque in all models.
- **Convertible Air Delivery:** Horizontal or downflow to accommodate rooftop or horizontal application.
- **Galvanized Steel Cabinet:** Polyurethane finish provides 950 hour salt spray protection to resist corrosion.
- **Wire Guard Coated with Earth Friendly Epoxy and Mesh Hail Guard:** Will never rust and protects the coil from being damaged by balls, lawnmowers, hail etc.
- **Access to Controls and Major Components:** Easy in and out service.
- **Low Voltage Transformer:** Includes 3 Amp fuse to protect low-voltage circuit.
- **Corrosion-Resistant Drain Pan:** Quickly drains away evaporator condensate.
- **One Piece Top for Great Fit and Finish, Total Seal:** Well designed, quality construction. Drip edge on top panels whisks away rainwater. Embossed bottom pan keeps blower compartment dry.
- **Quiet Operation:** Low vibration fan blade combined with custom venturi condenser fan.
- **SmartLite® Control Board:** Provides extended life to igniters using hot surface ignition technology. Programmed to learn the heat-up characteristics of the igniter, then adapt the ignition time to the characteristics of the furnace so the igniter is energized appropriately.

** Denotes factory set heating speed

Tap 1 is fan only

Data is shown without a filter

Heat rise: Btu/h (Input) = CFM * Δ T * 1.08

Δ T = (Btu/h * 0.83) / (CFM * 1.08)

To comply with government mandated efficiency standards, two openings are required for airflows above 1,600 CFM.

Temperature rises in the table are approximate. Actual temperature rises may vary.

Individual cells shaded in gray indicate a temperature rise outside the recommended range.

To comply with government mandated efficiency standards, speed settings which do not have data are not allowed in HEAT mode.
